Professional Experience

OneNeck IT Solutions / US Signal — Application Analyst III

Remote | April 2022 – February 2026

- Worked as a Salesforce Administrator to implement enhancements, resolve user issues, and support sales, service, and finance processes in an Agile SDLC environment.

- Served as Primary Administrator for Microsoft Dynamics 365 CE and supported requested fixes and process enhancements.
- Acted as Release Manager, moving projects from development through UAT and into production using Gearset.
- Developed automated solutions for HR, Legal, and Billing using Microsoft Forms, SharePoint, and Power Automate.
- Created process documentation and supported user training for business application changes and enhancements.

Matrix Service Company — Application Analyst III

Tulsa, OK | July 2016 – January 2022

- Served as primary administrator across multiple application platforms in cloud, on-premise, and Citrix-connected environments.
- Managed software upgrade lifecycles and annual maintenance agreements for business-critical applications.
- Provided escalated application support as a subject matter expert and managed vendor support cases.
- Architected and supported solutions involving access control, document control, safety incident reporting, and process automation.
- Assisted departments with software selection and technology decisions to improve efficiency and automation.

Matrix Service Company — IT Project Manager

Tulsa, OK | July 2013 – January 2016

- Managed projects ranging from company acquisitions to software deployments.
- Used Microsoft Project to manage timelines, budgets, and resource allocation.
- Maintained vendor relationships and helped develop project standards to improve efficiency and visibility.

Alliance Coal — SharePoint Business Analyst

Tulsa, OK | February 2013 – July 2013

- Assisted in the design and development of a business intelligence portal using SharePoint 2013.
- Created SharePoint application prototypes with Axure 6.5 and supported business process solutions using SharePoint and Nintex workflows.
- Trained users on SharePoint collaboration features, alerts, calendars, and Outlook integration.
- Supported testing for the upgrade of the intranet from SharePoint 2010 to SharePoint 2013.
